THE REAL DEAL

Thorlos Outdoor Collection

STREET

Elite performance on pavement to hard pack trails; athletic performance footwear to trail runners.

XCCU

LODGE

Low intensity, warm or cool climate, non-challenging terrain; trail runners, low cut hikers or casual shoes.

H1C

XWXU

SUMMIT

High intensity, extreme climate, difficult terrain and/or carrying heavy pack; mountaineering, heavy duty or mid-duty boots.

APPROACH

Moderate to high intensity, wide range of climate conditions, challenging terrain and/or carrying pack; mid-duty boots.

BASE CAMP

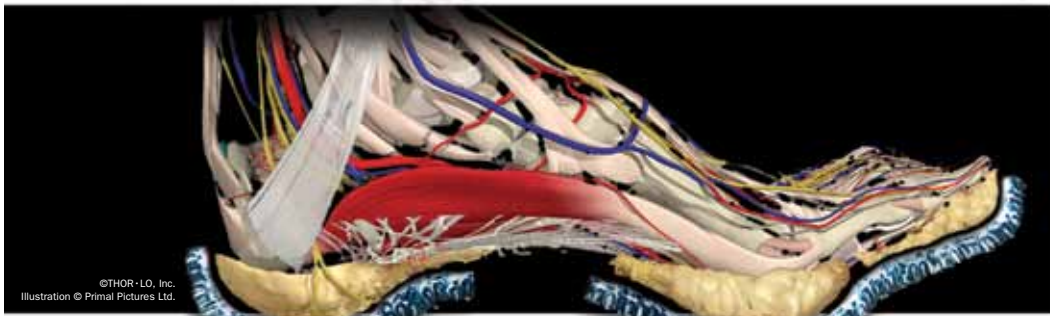

Moderate intensity, moderate climate, rolling terrain and/or carrying day pack; mid-duty boots or light duty boots, low cut hikers or trail runners.

OUTDOOR NEEDS ASSESSMENT

THE ORIGINAL ACTIVITY SPECIFIC SOCK PRODUCT

providing benefits that no other product can equal

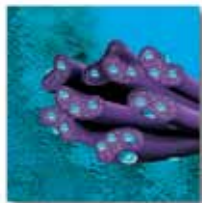

Anatomical padded design puts protection where it's needed - in the weight bearing areas of the feet, which is consistent with nature's "design" of the foot.

Protective Padding in Heel Area Minimal Padding in Arch Area Protective Padding in Ball Area

Fiber blends that "dimensionalize" protection

Anatomical padding provides protection where it's needed; various fibers and fiber blends add the protective dimensions of resiliency, wicking and temperature control for any climate - from subzero to sub-Sahara... and everything in between.

THOR•LON® Acrylic

THOR•LON® acrylic yarns are exclusively developed for our Thörlo[®] construction. "Trapped" perspiration in the shoe environment tends to "flatten" or crush common acrylic yarns. THOR•LON® acrylics are specially spun to maintain both softness and resiliency, which maximizes foot comfort, blister protection and product durability.

Coolmax®

INVISTA manufactures this fiber with a unique four-channelled cross section that produces a soft, cotton-like yarn with such superior moisture transport qualities that skin temperatures prove perceptibly cooler in comparison yarn testing. Thörlo[®] with Coolmax® provide excellent blister protection while keeping you comfortably cool. Thörlo[®] generally uses more Coolmax® in its sock designs than other sock products.

Nylon

Introduced by DuPont as a "miracle" fiber, stretch nylon makes everything we do possible. Multiple size ranges, good fit and shape retention, along with durability, are key contributions made by various types of continuous filament nylon.

Merino Wool/Silk

Imported "wild" silk is blended 35% with a soft and resilient shrink treated merino wool to produce incredibly warm performance in OUTDOOR and SKI Thörlo[®]. Silk enhances the softness, durability and pill resistance of natural 100% wool. Superior in comfort, warmth and durability.

Wool/THOR•LON®

This performance fiber blend is intended for active cold climate use and is designed for improved blister protection and comfort without sacrificing significant insulating properties of natural wool. The addition of 50% THOR•LON® acrylic improves loft and resiliency, and greatly enhances moisture management qualities that 100% wool yarns alone cannot provide.

OUTDOOR SOCK PRODUCTS - THE REAL DEAL

tested and proven on expeditions to...

- Everest
- K2
- Kangchenjunga
- Aconcagua
- Denali
- Kilimanjaro
- Rainier
- The 7 Summits
- The North Pole

THE REAL DEAL

*"We have been fans of Thorlo socks for many years, but the ultimate test came last summer when we traveled to Africa, our goal being to climb **Mount Kilimanjaro**. I'm happy to report that our summit attempt was successful and also that our Thorlos passed with flying colors. There are numerous factors to consider during an expedition of this nature, so it was a big relief that our FEET REMAINED WARM, DRY AND COMFORTABLE FOR THE ENTIRE WEEK-LONG CLIMB. Thank you Thorlos, for making such a reliable and high quality product."*

Debbie and Jack M.

"My actions speak louder than words. I wear Thorlos socks for the best reason. They keep my feet from freezing at and above 8000 meters when I am guiding my clients. I need this security and so do my clients."

Marty Schmidt,
Professional Guide

*"I climbed **Everest** with Mountain Professionals this spring. Thorlos was one of our sponsors and we were given a pair of mountaineering socks for use on our climb. I just wanted to thank you and let you know I wore them on the summit day. It was a 20-hours very cold day and your socks are excellent as far as comfort and warmth. Thank you for your sponsorship and great product. I will be wearing your socks for the remainder of my 7 **Summits** (4 down, 3 to go)."*

A.B.

FROM THE STREETS

EXPERIA® COOLMAX® 2011/2012 COLLECTION

Mesh Polyester for maximum breathability.

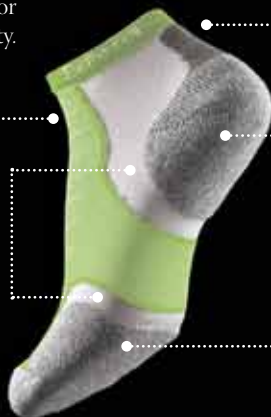

Lightweight Achilles Tendon Pad protects against rubbing and chafing, while functioning as a heel lock.

Ultra lightweight sock frame. Nylon covered Lycra® provides contoured aerodynamic glove-like fit.

Specially sculpted THORLO® pads in the ball and heel provide protection from shear and impact where needed. Experia® eliminates all but the most essential padding, significantly reducing the weight of the sock.

COOLMAX® Enhanced Performance in the ball and heel pads provide enhanced moisture management.
