DESCRIPTION

		< WARMTH	< WATER RESISTANCE	< BREATHABILITY	< MOISTURE MANAGEMENT	< BACTERIA CONTROL	< FABRIC THICKNESS	< WIND PROTECTION	< ELASTICITY	
NEW	PINACL 89% Recycled Polyester 11% Elastane 445gsm ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	Superior Wind/Water resistant 3 part laminate helps to keep you warm and comfortable in the most extreme conditions. Made from 89% Recycled Polyester materials, PINACL is not only fully sustainable - it's unbelievably comfortable and soft against your skin.
	PRO-STRETCH PLUS 95% Recycled Polyester 5% Elastane 260gsm Treated with Silvadur 900 antimicrobial silver ions ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	Providing a lofty fleece interior and smooth exterior has made Pro-Stretch PLUS a favorite for cold weather athletes. With 8% Elastane woven directly into the yarn, each product performs as intended.
	PRO-STRETCH 88% Recycled Polyester 12% Elastane 220gsm Treated with Silvadur 900 antimicrobial silver ions ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	Pro-Stretch is a 4 way stretch moisture wicking material that is great for use as a baselayer. It is thin and fleeced on the inside for great comfort. The outside is a snow shedding weave. This is a high performance fabric with great versatility. Now treated with DOW Silvadur providing superior odor and bacteria control through its polymer based silver ion fabric treatment process.
	MICROFLEX 95% Recycled Polyester 5% Elastane 270gsm Treated with Silvadur 900 antimicrobial silver ions ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	MicroFlex is a lightweight stretch fleece that provides lasting warmth and comfort. Wicking properties help draw moisture away from the body. This fleece provides the best mix of price and performance.
UPDATED	DRI-RELEASE WOOL® 85% Recycled Polyester 9% Merino Wool 6% Spandex 260gsm ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	Dri-Release Wool® provides superior warmth because of its Merino wool content, yet it is a true 4 way stretch fabric. The Freshguard control offers odor protection that doesn't wear out and is the fastest drying high end base layer fabric on the market.
	MERINO-TENCEL 60% Mulesing free Merino Wool, 40% Biodegradable Tencel 250gsm ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	With the ever increasing pressure on the environment and its resources, the ability to adapt is key. Made from a blend of Merino Wool and Biodegradable Tencel fibers, the Suelo collection has a limited impact on the environment without compromising cold weather performance and comfort.
	MERINO-BAMBOO 100% Mulesing free Merino Wool 100% Bamboo Viscose 320gsm ECO FRIENDLY	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	<div></div> <div></div> <div></div> <div></div>	The combination of 100% Mulesing free merino wool and 100% Bamboo makes for the ultimate material when used in any cold weather performance application. Inherent antimicrobial properties in both the merino and bamboo help to limit the growth of fungus and bacteria between washes - not to mention it's completely sustainable.

TECHNOLOGY

A passion for the outdoors is one that CTR shares, and providing only the best for its conditions drives us forward. Building on 10 years of experience, the front end of progress is the only place to be. Adapting alongside shifts in weather conditions, emerging technology, and the daily movements our products endure, CTR development is in a constant state of evolution.

Our process begins with those that put the products to use, out in the elements, and it is these warriors that inspire our continual progress. With an industry-leading variety of products, the use factor of each piece drives the entire roster forward. From winter's best, to the worst of its conditions, CTR's performance and innovation move with you, upwards and towards the wonders of the unknown.

Pulling from the forefront of technology, CTR utilizes industry leading materials to push innovation and utility. Newly integrated laser cut breathing ports further enhance product performance in breathability, moisture management, comfort, and thermal regulation. Building upon recent advancements, such as PINACL, we continuously push for premium protection against cold and wind.

MULTI-PURPOSE HINGED BALACLAVA

When trying to choose what kind of winter protection accessory you are going to use, it helps to know that CTR has thought of it all.

Constructed with an outer hinge panel that helps shed snow from building up and gives 2 layers of protection for your ears, all our Multi-Tasker, Multi-Tasker Pro and Multi-Liner styles can be worn 4 different ways without removing them from your head.

1 FULL FACE AND NECK

2 HEAD AND NECK

3 NECK AND FACE

4 NECK

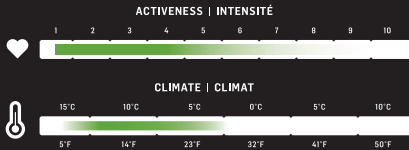

COLLECTION CLASSIFICATION SYSTEM

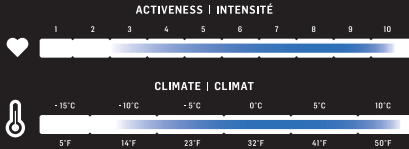

Knowing what product to use in any given condition is not always an easy task. With so many diverse and specialized products in the CTR collection, our new collection classification system helps simplify the process. Based on 2 scales, it's easy to find which product is best suited based on weather conditions and activity levels.

Color coded badges help to identify each of our 6 collections and its primary function.

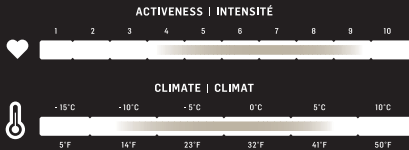

Each product has been given a target functional range, which takes the guess-work out of choosing which product to use. Scales are suggested based on typical use and performance, your needs may vary accordingly.

Ultimate protection from the harshest of winter conditions is the goal for our Howler collection. Designed for the most extreme environments, each piece helps combat Mother Nature and falling mercury levels.

The Mistral group emphasizes our 4-way stretch moisture wicking fabrics with integrated wind resistant inserts, mesh sections and the ultimate in 3D paneling to provide a superior fit in the most varied of winter conditions. All products are made from Recycled polyester fibers and treated with Silvadur 900 for superior protection against bacteria and odor.

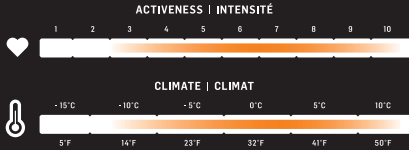

Sustainability and environmental initiatives is what drives our Suelo Collection. The PURE program is made from 100% Mulesing free Merino Wool with a 100% Bamboo knit lining. Providing increased thermal warmth without bulk while being 100% organic and antimicrobial. While our mid weight merino fleece continues to provide a soft, comfortable, moisture wicking alternative to standard polyester fleece.

Born in the Quebec Laurentian mountains, the Nordique collection marries the warmth and versatility of Merino wool to the performance and functionality of Polypropylene. Traditional styling keeps everything simple and on point.

Staying warm and comfortable through natural Merino Wool fibers is the driving factor in this performance base layer collection. Whether it be in a AirKnit, 4 way stretch seamless knit or with a Dri-Release base layer - superior moisture management, odor control and lightweight materials keeps you comfortable in all conditions.

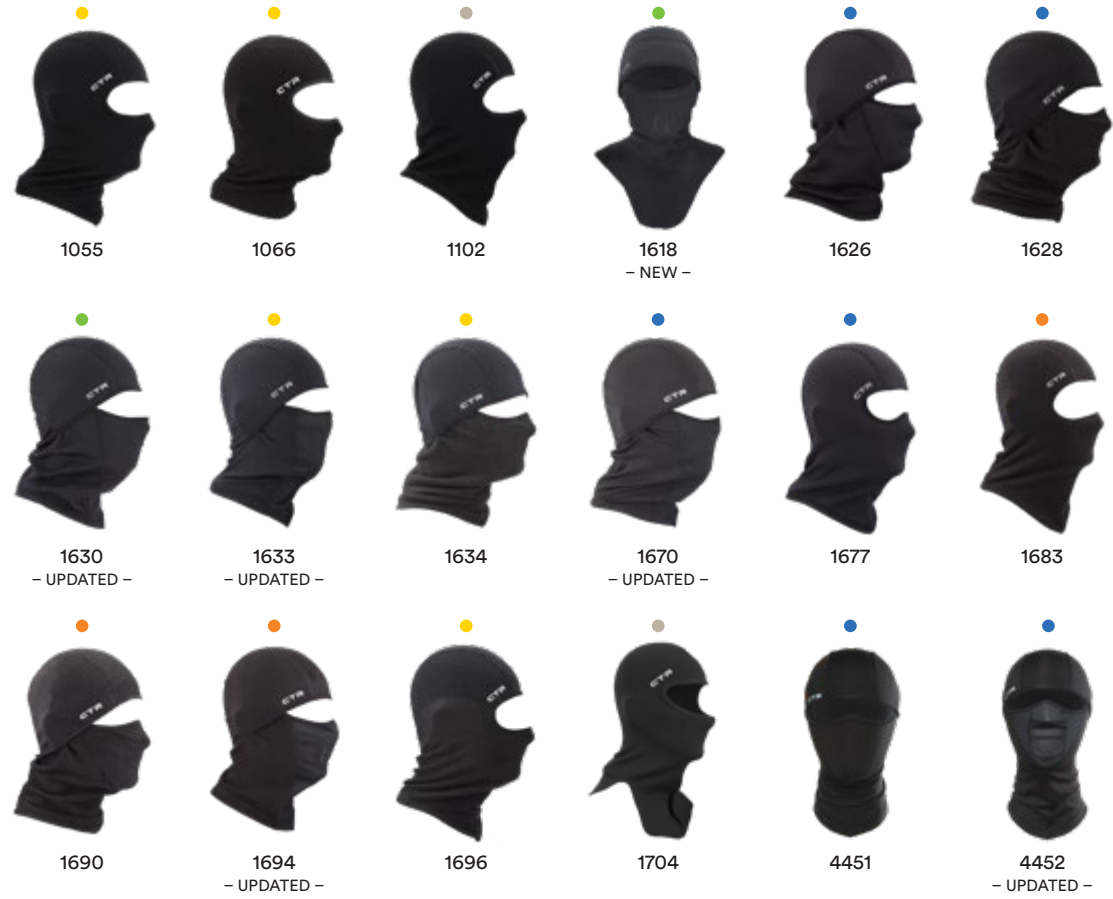

You can't ever go wrong with polar fleece, and our Tempest collection doesn't disappoint. Warm, soft, comfortable and moisture wicking, our MicroFlex is in a class of its own.

OUR CTR HANDWEAR COLLECTION IS BUILT FROM NECESSITY. BY CREATING A TRUE PROGRESSION IN PERFORMANCE AND FUNCTION FROM TECHNICAL TO BASIC, SKI TO LINERS, THE DECISION AS TO WHICH GLOVE IS MOST SUITABLE FOR WHICH CONDITION HAS BEEN SIMPLIFIED.

GLOVE FEATURES

The evolution of our glove program came from the need to fill a gap. Taking inspiration from our meticulous attention to detail in the design and development process, each product was built with a specific function and purpose in mind. From the integration of full water/wind resistant interior bag construction to tonal reflective trims, full silicon gripper palms and wrist leashes – we spared no feature or function. Below you’ll find just a few of such features.
